### Product Summary

The SimRush One package includes an outdoor device with professional LTE chip and high gain antenna for use with one data sim. This package includes a business class indoor wireless device for WiFi coverage with guest wifi as standard.

### Product Description

The SimRush One model delivers superfast broadband whilst also providing WiFi coverage at improved speeds to your premises. The SimRush One Outdoor Unit (ODU) uses a professional LTE chip with integrated high gain antenna and is mounted externally. The Indoor Controller Unit (ICU) provides a fully featured firewall and dual concurrent radio for WiFi in both 2.4 GHz and 5GHz frequencies (802.11 a/b/g/n/ac).

All five ports available on the controller provide 10/100 ethernet connections to any wired devices.
